PROFESSIONAL SUMMARY

Software Developer with hands-on experience designing and building full-stack mobile and web applications. Skilled in C#, ASP.NET MVC, SQL, and Flutter, with experience deploying applications using Microsoft Azure, Firebase, and Supabase.

Product-oriented developer with proven ability to design database-driven systems, implement real-world workflows, and deliver complete applications from concept to deployment.

TECHNICAL SKILLS

Languages:

- C#, Dart, Java, SQL

Frameworks & Platforms:

- ASP.NET MVC (Framework), Entity Framework, Flutter, Firebase, Supabase, Android Studio

Databases & Cloud:

- SQL Server (SSMS, Azure Data Studio), PostgreSQL (Supabase), Firebase, Microsoft Azure

Tools & Concepts:

- Git & GitHub, REST APIs, MVC Architecture, Relational Data Modeling, Authentication & Roles
-

PROJECT EXPERIENCE

Mobi Suite – Mobile POS & Inventory Management Platform

Founder & Software Developer

Tech: Flutter, Supabase, Firebase

- Designed and built a mobile point-of-sale system for small and medium retailers.
- Implemented inventory management, product categorization, and sales tracking.
- Designed transactional database structure using sales and sale_items to record every checkout and item price.
- Built the system to operate without expensive hardware, with support for optional peripherals.
- Focused on scalability, clean UI, and real-world retail workflows.

FarmTrack Pro – Smart Farm Management & E-Commerce System

Full-Stack Developer

Tech: C#, ASP.NET MVC, Entity Framework, SQL Server, Azure, Bootstrap, JavaScript

- Built a comprehensive web-based farm management system covering operations, workforce, livestock, inventory, crops, and sales.
- Implemented job applications and task management with recurring schedules, progress tracking, and department-based assignments.
- Designed inventory management with usage logs, restocking thresholds, and supplier-linked replenishment logic

- Developed livestock management including health records, weight tracking, vaccination schedules, and reproduction methods
- Implemented crop & plot lifecycle tracking with dashboards for planting, fertilization, pest control, irrigation, and harvesting
- Deployed academic environment using Azure App Service and Azure SQL Database

Westend Motors – Automotive Dealership Management System

Software Developer

Tech: C#, ASP.NET MVC, Entity Framework, SQL Server, Azure Blob Storage

- Developed a full-featured dealership management platform for vehicle sales, trade-ins, and servicing
- Implemented vehicle inventory management with specifications, pricing, images, and availability states
- Built a trade-in workflow covering submission, evaluation, inspection scheduling, approval, and inventory conversion
- Developed customer portal for browsing vehicles, booking services, and tracking service history
- Implemented appointment and service management with technician assignment and status tracking
- Designed role-based dashboards for Admin, Sales Staff, and Customers
- Integrated Azure Blob Storage for vehicle image uploads and management

EDUCATION

Diploma in ICT: Application Development

Durban University of Technology

Key Areas:

- C# & ASP.NET MVC using Microsoft Visual Studio.

- SQL development using SSMS and Azure Data Studio.
 - Cloud computing and deployments using Microsoft Azure.
 - Java-based Android development using Android Studio.
-

ADDITIONAL

- Strong self-taught experience in Flutter beyond formal curriculum.
 - Experience building full systems independently from design to deployment.
 - Comfortable working across mobile and web platforms.
 - Strong problem-solving mindset and continuous learner.
-
